PROFILE

Product designer specialising in luxury packaging and fine jewellery, with experience across furniture, lighting and textiles. I combine modelling in Rhinoceros and Grasshopper with hands-on workshop practice (soldering, porcelain and prototyping), which allows me to design with manufacturing in mind from the outset. Key projects include **Old Jeffrey**'s first fragrance, a corporate gift approved by **Parfums Christian Dior Iberia** and a swimwear collection featured in the Top 5 of **Fuera de Serie (Expansión)**. I currently develop fine gold jewellery at **AlegríaB**.

PROFESSIONAL EXPERIENCE

Product Designer · Fine Jewellery · AlegríaB — Apr 2026 – Present · Madrid

- Model fine jewellery in gold and pearls in Rhinoceros to manufacturing tolerances: stone seats, bails, hinges and joints.
- Validate volume and proportions with resin 3D-printed prototypes before casting.
- Prepare production files and coordinate directly with the external casting workshop; produce renders for catalogues.

Product Designer Intern · María Torné Cerámica & Joyería — Oct 2025 – Feb 2026 · Madrid

- Designed in Rhinoceros and 3D-printed production moulds and cutting dies that replaced cardboard templates, reduced errors and let several people produce at once.
- Applied a 4 mm offset to compensate for porcelain shrinkage and validated dimensions after firing before release to production.
- Produced porcelain, brass and silver jewellery: Nerikomi, torch soldering, annealing, polishing and assembly.

Junior Product Designer · Old Jeffrey — Oct 2023 – Jun 2024 · Madrid

- Led **Indalo**, the brand's first fragrance, from naming to packaging (bottle, metal cap, labels and rigid box), with 3D models, renders and supplier quotations through pre-production.
- Designed the prints for the 2025 **OJ Napoli** swimwear collection, from hand sketches to final artwork in Illustrator. Featured in the Top 5 by Fuera de Serie (Expansión).
- Produced tech packs and specifications for each print and coordinated sampling and quality control with the factories in Naples.

BRAND PROJECTS (UDIT)

Dior's Embrace · Parfums Christian Dior Iberia × UDIT — Sep 2024 – May 2025

- Designed a luxury corporate gift for employees made only from the Maison's own waste: a box lined with exhibition canvas, recycled fabrics and raffia, with a fabric rose revealed on opening.
- Led brand and UX research, three concepts and a physical prototype; **the concept was approved by Dior Iberia**.

Giralia · Quimbaya by Edwin Rodríguez × UDIT — Sep 2023 – May 2024

- Designed and built a hanging bottle display with **11 lit rotating trays** for a Michelin-starred restaurant: 3D model, CNC drawings and prototype, **highlighted by chef Edwin Rodríguez**.

Other projects: Nemyx (sound-reactive wearable with Arduino-programmed LEDs) · Soleris (lamp in CNC-cut wood and concrete) · Naya (3D-printed jewellery) · Ondara (parametric lamp). Full case studies in the portfolio.

SKILLS

3D & rendering: Rhinoceros · Grasshopper · Fusion 360 · SolidWorks · Solid Edge · AutoCAD · KeyShot

Product development: Technical drawings · Tech packs · BOMs · Prototyping · Supplier sourcing · Quality control

Fabrication & materials: 3D printing (FDM, resin) · CNC · Thermoforming · Silicone moulds · Basic electronics (Arduino, addressable LEDs) · Jewellery for casting (gold, pearls, stone setting) · Metal jewellery · Porcelain · Textiles · Recycled board

Graphics & AI: Illustrator · Photoshop · InDesign · Textile pattern design · Vizcom · Gemini · ChatGPT · Manus

EDUCATION & LANGUAGES

Official Degree in Product Design · UDIT (Universidad de Diseño, Innovación y Tecnología) — 2022 – 2026 · Madrid
Final project: **Amma**, a modular 3-in-1 baby carrier, backpack and bag system.

International Baccalaureate · Knightsbridge Schools International — 2019

Languages · Spanish (native) · English (C1)
